# Paraview Solution

## - Customer Identity and Access Management

Paraview’s Customer IAM solution equips businesses to effectively manage customer identities, focusing on both security and user experience. For a seamless process, it integrates Multi-Factor Authentication (MFA) and social login options, enhancing security while reducing friction for users.

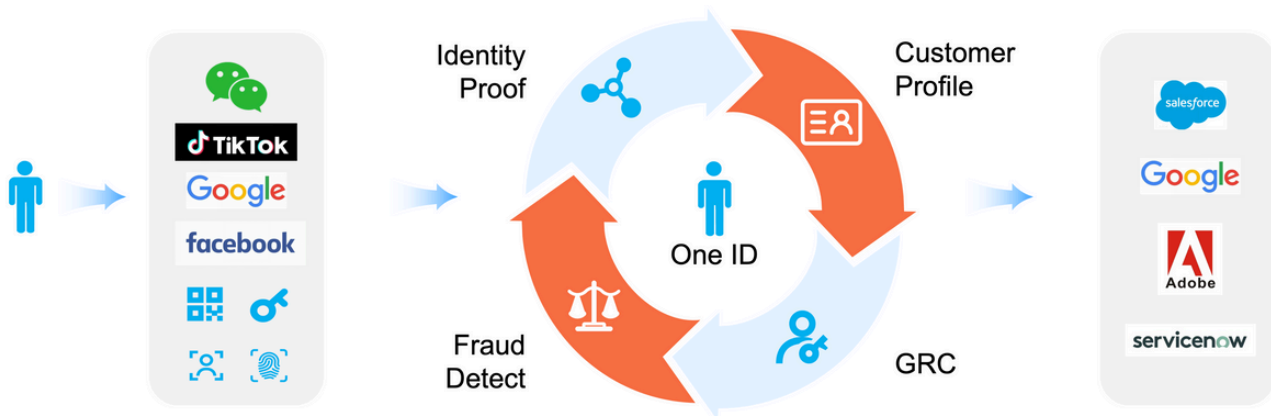

Additionally, Paraview’s CIAM solution addresses regulatory compliance needs through robust data handling practices and detailed audit trails, making it easy to align with global standards like **GDPR and CCPA**.

With these capabilities, Paraview CIAM solution empowers organizations to protect sensitive customer data, boost satisfaction, and streamline operations in today’s digital landscape.

### Customer Identity Solution

Innovative CIAM solution, Integrated Social, Identity Fraud Detection, Identity Proof and Compliance

**Rapid to Value, Reduce 80% effort and cost saving ! Award Solution**

## - Workforce Identity and Access Management

Paraview Workforce IAM Solution streamlines identity management with essential features, ensuring seamless access control and reducing administrative overhead across the entire identity lifecycle. With MFA, SSO, and adaptive authentication, it strengthens security while simultaneously enhancing the user experience.

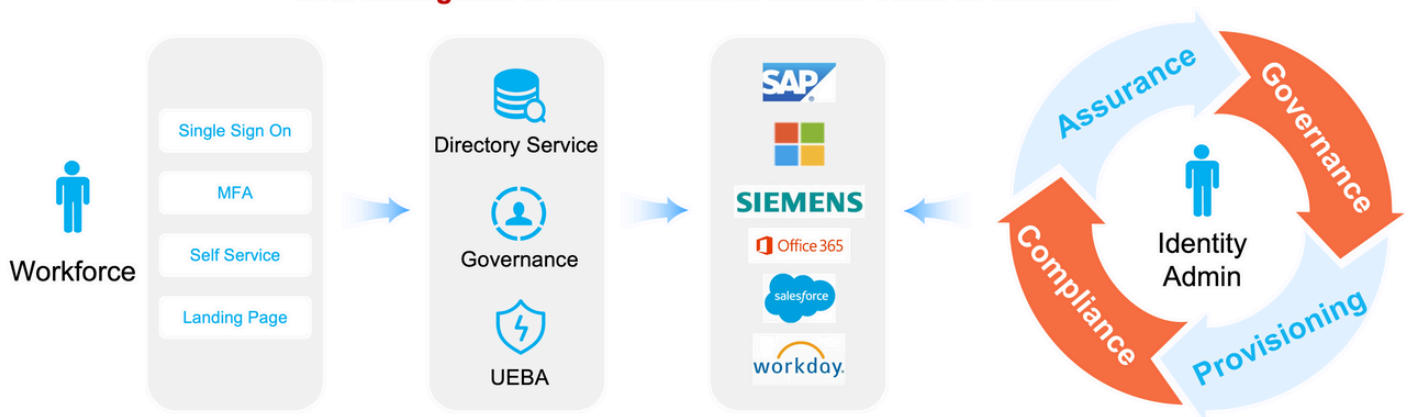

Additionally, the solution enhances compliance by **automating audit trails**, making it easy to monitor access activities and meet regulatory standards.

With these capabilities, the solution helps organizations protect sensitive data, boost efficiency, and accommodate a growing workforce.

### Workforce Identity Solution

Comprehensive IAM platform, SSO, MFA, IGA, UEBA All-In-One solution

**96% Willingness to Recommend in Gartner Voice of Customer**

## - Privileged Access Management

Paraview's Privileged Access Management (PAM) solution strengthens enterprise security by implementing advanced controls like Credential Management and Session Management.

With **real-time monitoring and recording of privileged sessions**, Paraview PAM ensures critical actions are monitored and auditable. **Fine-grained access policies** enable dynamic control over sensitive resources, supporting compliance with industry standards and reducing risk exposure.

Paraview's PAM solution empowers organizations to protect sensitive assets efficiently, streamline privileged access workflows, and drive digital security forward. We look forward to discussing how Paraview PAM Solution can meet your security objectives.

### Privileged Access Solution

Cloud Native, Application and Data Center Infrastructure **FULLY Supported**

**Defend Against Attacks:**  
Secure

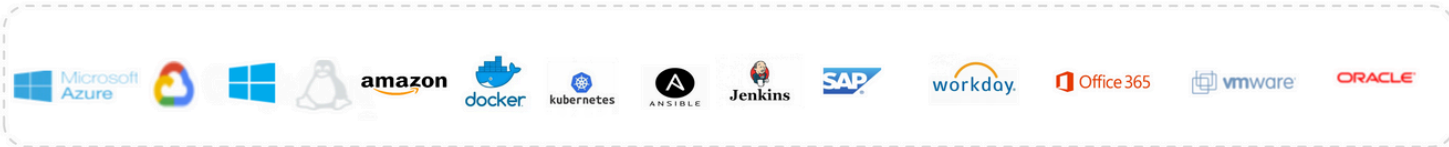

**Drive Operational Efficiencies:**  
Simplify

**Enable the Digital Business:**  
Automate

**Satisfy Audit and Compliance:**  
Standardize

## - API Management and Security Solution

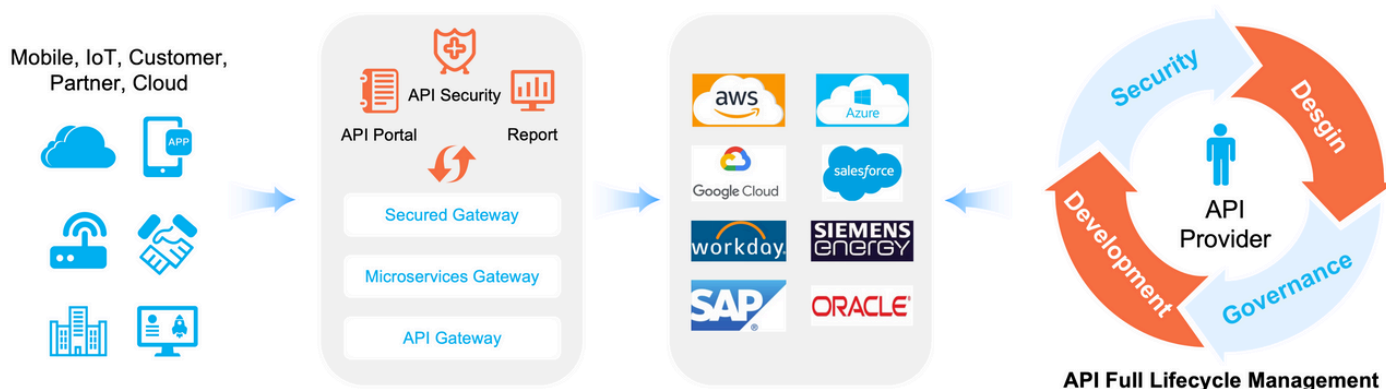

Paraview's API Security and Management solution provides a robust framework for securing, managing, and optimizing API ecosystems. This integrated solution features three essential components: **API Gateway, API Security, and Developer Portal.**

The API Gateway serves as the frontline defense, implementing advanced authentication methods, dynamic load balancing, and real-time monitoring to ensure security and optimized performance. API Security utilizes data encryption and real-time threat detection to protect your API assets, while the Developer Portal facilitates self-service access and testing tools for developers. Together, these components deliver seamless and secure API management for your organization.

### API Management and Security Solution

**One-stop API Full Lifecycle Management, encompassing API Gateway, API Security and API Integration**

**Rich Feature Set, Enhanced Security, Cross-Platform and Multi-Cloud Support, Extensibility and Plugins**
